

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of claims:

Claims 1-3 (canceled).

Claim 4 (new): A radio operated communication terminal,
comprising:

at least two housing parts, which can move with respect to one another;

at least one miniature motor, operatively coupled between the two housing parts; and

the housing parts can be moved by means of miniature motors;

a processor operatively coupled to the at least one miniature motor, wherein the processor initiates a signal to the motor causing movement in at least one of the two housing parts.

Claim 5 (new): The radio operated communication terminal as claimed in claim 4, wherein the miniature motors are driven such that direct force feedback is provided via the miniature motors when the manual movement of the housing parts is used to make an input during a games function.

Claim 6 (new): The radio operated communication terminal as claimed in claim 4, wherein the miniature motors are driven such that incoming signaling data is output by means of a corresponding movement of one housing part.
